

## VISION SCREENING REPORT FORM

FOR \_\_\_\_\_

### VISION SCREENING POLICY

Since eighty percent of what children learn comes from their eyes and vision, eye care professionals believe it is important to detect vision problems before they affect a child's performance at school. It is estimated that one in six children have a vision problem.

This is a vision screening, and **not a complete eye examination by a doctor**. It is designed to identify children who have trouble seeing things at a distance, up close, or who have difficulty making both eyes work together. **No attempt will be made to check the health of the eyes.**

Vision screening does not replace a complete examination and it will not identify every child with an eye problem. The Ontario Association of Optometrists recommends that every child have his/her first eye examination by the age of six months and when no abnormalities are detected, again at the age of three. Annual eye examinations are recommended for school aged children and are covered by OHIP.

If your family does not have a vision care examination provider, please contact an optometrist in your area.

**Optometrists are dedicated to providing quality primary eye care.**

### THE LIONS/LIONESS CLUBS OF DISTRICT A- 16

are pleased to present this vision screening report.

SCREENING CRITERIA	PASS	Further Investigation Advised
Far Visual Acuity	_____	_____
Alignment	_____	_____
Refraction	_____	_____

\_\_\_\_\_ Your child has passed all the components of the vision screening.

\_\_\_\_\_ Your child may have a vision problem and should have a complete eye and vision examination.
