

Paperwork done before the screening day.

Once you obtain the permission forms from the school.

Fill out a student report form for each student. Divide them into two piles. One pile for parents who want share the results with the school.

The second pile is for those parents who DO NOT want to share the results.

Now fill in TWO summary sheets which list the names of the children to be screened. The permission summary sheet goes to the principal or teacher and the Non Permission Summary Sheet stays with the Club.

Each child screened is given a sealed envelope with their name on the front and a completed individual screening report inside that goes home to the parents. The sealed envelopes go to the principal for distribution. One person collects, completes, signs and seals the forms.

Review the 3 stations before screening day from the kit. The Lea station is a wall chart with symbols. The Stereo station is a 3D test with the fly and 3 animals. The Plusoptix station uses the new camera unit.
